Caring For Your Vicenza Designs Hardware

For the most part, simply dusting your Vicenza hardware is all that is necessary. You may use a very soft brush to remove dust from designs and crevices, and a soft micro-fiber cloth to gently dust the surface. If necessary you may clean with a soft damp cloth using a mild dish soap. Generally, your

Vicenza hardware will not require anything more than this to stay looking as beautiful as ever. Never use abrasive cleaners or pads, as these will mar the finish.

With the exception of our Antique Silver and Polished Silver finishes, we do not recommend any additional measures, other than the gentle cleansing described above. In the event that your polished, non-plated hardware (Antique Silver and Polished Silver) should require deeper cleaning, you may use a non-abrasive metal polish with a soft cloth to restore your hardware to its original luster.
